

02161: Software Engineering 1

2.1 Glossary

1. Based on the description of the user requirements of the library application from programming exercise 1, create a glossary of the important terminology.

2.2 Use Cases and Use Case Diagram

1. Based on the description of the user requirements of the library application from programming exercise 1, provide a *use case diagram* showing the use cases of the library application.
2. Take one or two use cases (not trivial ones) and present detailed use case description for them with main-, alternative-, and exceptional scenarios.

Hand-in

- Please send the glossary, the use cases, and the use case diagram as *one PDF* file to me (hub@imm.dtu.dk)

Programming exercise

- Finish programming exercise 1 and continue with programming exercise 2
- Please send the solution as a ZIP file of the Eclipse project to hub@imm.dtu.dk
