

02161: Software Engineering 1

2.1 Glossary

1. Based on the description of the user requirements of the library application from programming exercise 1, create a glossary of the important terminology.

2.2 Use Case Diagram, Detailed Use Cases, and User Stories

1. Based on the description of the user requirements of the library application from programming exercise 1, provide a *use case diagram* showing the use cases of the library application.
2. Take one or two use cases (not trivial ones) and present detailed use case description for them with main-, alternative-, and exceptional scenarios. Please use the template introduced in the slides of week 2.
3. Convert the use case scenarios to user stories

Hand-in

- Please send the glossary, the detailed use cases, the use case diagram, and the user stories as *one PDF* file to me (huba@dtu.dk)

Programming exercise

- Finish programming exercise 1 and continue with programming exercise 2
- Please send the solution as a ZIP file of the Eclipse project to huba@dtu.dk
