

INDEX for lecture notes in Data Logic

Numbers refer to chapters and sections

A

abduction 19.1
arithmetic functions 11.5.4
arity 7.1.1
atomic clause 6.2
atomic formula 7.1.1
atomic propositions 1.3
axiomatic logic 3.6
axioms 3

B

BNF grammar 14.4.1
branching 11.3.3

C

classical logic 17.2.4
class(ification) logic 5
clause 4
closed formula 7.1
closed world assumption CWA 18.2
closure 6..5.5
CNF 14.4.1
completeness 3.5.2
completion of definite clauses 18.2.2
compound formula 7.1.1
conjunctive normal form 4.4
conjunction 1.3
consequence, logical 2.4
consistency 3.5.3
context-free language 14.2
counterfactual 19.2.2
CWA 18.2

D

database query 6.6
Datalog 6.2
deduction 19.1
deductive closure 3.4.5
deductive database 6.4
definite clause 4.3, 6.2.2
definite clause grammar 15.4
degree 7.1.1
derivation 14 difference list 15.2
disjunction 1.3

E

empty clause 4.3
empty list 12.1
epistemic logic 19.3.4
equality 18
equivalence, logical 2.6
existential quantifier 7.1

F

fact 6.2.4, 19.1
formal languages 14
formula 7.1.1
free variable 7.1
function symbol 7.1
functor 7.1

G

goal clause 4.3
goal driven proof 3.4.1
grammars 14, 15
ground 7.1.4

H

Herbrand base 6.7, 8.3
Herbrand universe 6.7
higher-order predicates 12.7.1

I

identity 18
implication operator 1.3
indefinite clause 4.3
induction 19.1
induction principles 11.5.3, 12.5
inference rule 3.2, 4, 17
interpretation 2.3, 8.2
intuitionistic logic 17.2.4

J

”junk” in interpretations 8.2

K

knowledge base 6.4

L

left recursion 14.4.3
lemma 3.6
list 12
list concatenation 12.6.3
logical consequence 2.4

M

many-sorted logic 13.4
matching 10.4.2
meta language 2.7, 16
metalogic 16.1
mgu 10.4.1
modal logic 19.3
model (logical) 8.3
model (of system) 1.1, 2.3
modus ponens 3.1
monotonicity 18.2.3
most general unifier 10.4.1

N

natural deduction 17
negative information 18.2
negation-as-failure 18.2.1
necessity operator 19.3
non-determinism 3.4
non-monotonicity 18.2.3

O

object language 2.7, 16
operators 1.3
"occur-check" 10.5.1

P

parser 14.4
Peano numbers 11.5
predicate 7
prenex form 8.6
possible worlds 19.3.2
Prolog 9.5
proposition 1.3
proposition atomic 1.3
proposition compound 1.3
proof (formal logical) 3, 5, 17

Q

quantification 7.1

R

recursion 11.5.3, 12.5, 14.4.3
reflexive transitive closure 14.2
reflexivity 18.1.1
refutation 4.8
relational database 6.6
resolution 4.7, 9.2

S

satisfiability 2.3.2
scope of variable 7.1

skolemization 8.6
SLD-resolution 9.2, 11.3.1
sorts 13.4.1
soundness 3.5.1
syllogistic logic 5
symmetry 18.1.1
strings 14.2.2

T

tautology 1.5
temporal logic 19.3.5
term 7.1.2
term substitution 10.2
termination 11.3.3
transitive closure 14.2.2
transitivity 18.1.1
trees 12.8
truth-value assignment 1.5
types 13.4.1

U

unification 10
unifier 10
universal quantification 7.1.1
unsatisfiability 2.3.2

V

validity 2.5

W

X

Y

Z

JFN, May 3, 2004
