Maze game

Bomb game

Components:

LC3 Processor
Main Memory – Dual port
UART
Keyboard controller ps2
VGA graphics controller

Control:

This is a two player game. Player 1 uses WASD to control directions and space to place the bomb. Player 2 uses the arrow keys to control the directions and enter to place the bomb.

About the game:

Bomberman was first published in 1983. It has since been published for many different platforms and in different version. We used the original for inspiration but made our own rules.
