

Exercise 02565-05	Introduction to Pro/ENGINEER - Features
Readings	ProEngineer Core and Part Topic Collection.
Purpose	The purpose of this exercise is to get started with Pro/ENGINEER and learn the concept of feature based modelling. You learn to define features and combine them into parts. You also learn to use the sketcher in defining a feature.
Part 1	Make geometric models of the objects A2, A3, A4, A6, and A7 defined in the appendices.
Part 2	Make geometric models of the objects in appendix B.
Delivery	For all exercises in the course you store the parts, drawings and assemblies on the hard disk. Later you make printed copies and a electronic copy on DAT tapes or CD-ROM (max 8 character names - no endings) . How to do this is explained later in the course.
