

Statistical Testing Exercises

Download the file:

Stat.zip

(the exercise programs) and the file

dataset_7.zip

(the exercise dataset) from the homepage. Unpack the file:

- `unzip Stat.zip`
- `unzip dataset_7.zip`

The exercise is to parameter tune the SA algorithm. Given the programs above (which are not complete !), perform the parameter tuning as specified in the slides. What is the best setting of starting temperature and alpha ?
