

immoptibox

A MATLAB TOOLBOX FOR OPTIMIZATION AND DATA FITTING

Hans Bruun Nielsen

DTU Compute

Technical University of Denmark

Version 2.2. November 2010

The toolbox contains a number of functions for optimization and data fitting. The selection of algorithms was guided by courses in optimization, but the MATLAB functions in the toolbox are expected also to have wider interest.

To get the toolbox, download [immoptibox.zip](#) to the directory, where you save your MATLAB files, use **unzip** to unpack it, and update your MATLAB path to include this directory.

A pdf version of the manual can be downloaded from [here](#).

The software is no longer supported or maintained. Questions can be directed to Prof. Per Christian Hansen, DTU Compute, email pcha@dtu.dk
