

Contents

1	Introduction	5
1.1	General	5
1.2	How Graphical Interfaces Work	7
1.3	A Note on Code Formatting	8
1.4	Some Books on Swing and related Topics	8
I	Basics	11
2	Frames, Panels and Layouts	13
2.1	Frames	13
2.2	Panels and Layouts	18
3	A First GUI	29
3.1	The Specification of the Application	29
3.2	The Counter Model	30
3.3	The Counter View	33
3.4	The Counter Control (Listeners and Events)	37
3.5	Summary	39
4	A Second GUI	45
4.1	The Specification of the Application	45
4.2	The Model Part	45
4.3	The View Part	47
4.4	The Control Part	51
4.5	The Embedding Structure	53
5	Displaying a Drawing	57
5.1	Method <code>paintComponent</code>	57
5.2	The Graphic Commands	58
5.3	A Simple Graphical Application	59
6	Adding the Mouse	65
6.1	The Mouse Listeners	65
6.2	Mouse Motion	66
6.3	Mouse Events	67
6.4	A First Mouse Application	67
7	Interactive Graphics	77
7.1	Specification of the GUI	77
7.2	The Model Part	77
7.3	The View Part	81

7.4	The Control Part	84
7.5	Running the Application	86
7.6	Summary and Remarks	87
8	Menus	89
8.1	Specification of the GUI	90
8.2	The View part	90
8.3	The Control Part	94
9	More on Listeners	97
9.1	Basics of Listeners	97
9.2	Implementing Listeners	98
9.3	Other Kinds of Listeners	103
9.4	Events	104
10	Loading, Saving and Displaying Text	105
10.1	Reading and writing Text Files	105
10.2	Displaying Text	111
11	Scrolling	115
11.1	Scrolling Texts Components	115
11.2	Scrolling Panels	117
12	Dialogs	121
12.1	The Basic Editor Application	121
12.2	File Selection Dialogs	124
12.3	User Defined Dialogs	127
12.4	Radio Buttons	128
12.5	Exchange of Information Between Dialog and Program	129
12.6	Predefined Option dialogs	134
13	More on Graphics	137
13.1	The Class Graphics2D	137
14	An Example Project	143
14.1	Specification	143
14.2	The Model Part	144
14.3	The View Part	152
14.4	The Control Part	157
14.5	Summary	160
II	More Components and Techniques	163
15	Pixel graphics	165
15.1	Some Graphics File Types	165
15.2	Class ImageIcon	166

15.3	Displaying Pixel Graphic in Swing	167
15.4	Manipulating Images	169
16	More Swing Components	183
16.1	Borders	183
16.2	Lists	185
16.3	Tables	193
16.4	Editable Tables	198
16.5	Trees	202
16.6	Combo Boxes	208
16.7	Split-Panes	213
16.8	Tabbed Panes	216
17	Grid-Bag Layout	221
17.1	The Classes <code>GridBagLayout</code> and <code>GridBagConstraints</code>	224
III	Advanced Topics	231
18	Styling Text	233
18.1	Positions	233
18.2	Text-Attributes	235
18.3	Document Listeners	237
18.4	Class <code>DefaultStyledDokument</code>	238
18.5	An Example for using Documents	239
19	Printing in JAVA	245
19.1	Interface <code>Printable</code>	245
19.2	Class <code>PrinterJob</code>	248
19.3	An Example Application	249
19.4	A Generic Class for Printing	252
20	Swing and Threads	255
20.1	Event Thread and Event Queue	255
20.2	Blocking a User Interface	256
20.3	Side Effects	262
20.4	Updating a Display at Runtime	263
21	A Generic Graphic Package	269
21.1	Specification of the Package	269
21.2	Structuring the Package	269
21.3	Helper Classes	271
22	Displaying HTML-Documents and Accessing the Web	277
22.1	Displaying a HTML Page	277
22.2	Using HTML Links	279
22.3	A Simple Web-Browser	280

22.4 Reading a Web Page	284
22.5 Harvesting Information from the Web	286
Solutions to Selected Problems	291
Some General Remarks on JAVA (TO BE EXTENDED)	305
.1 Objects, Non-objects and References	305
.2 Classes, Objects, Instances	307
.3 The Keyword <code>this</code>	307
.4 Declarations and Definitions	307
.5 Accessing Variables with <code>get</code> and <code>set</code>	311
Index	311
