

Robotter skal også være socialt intelligente

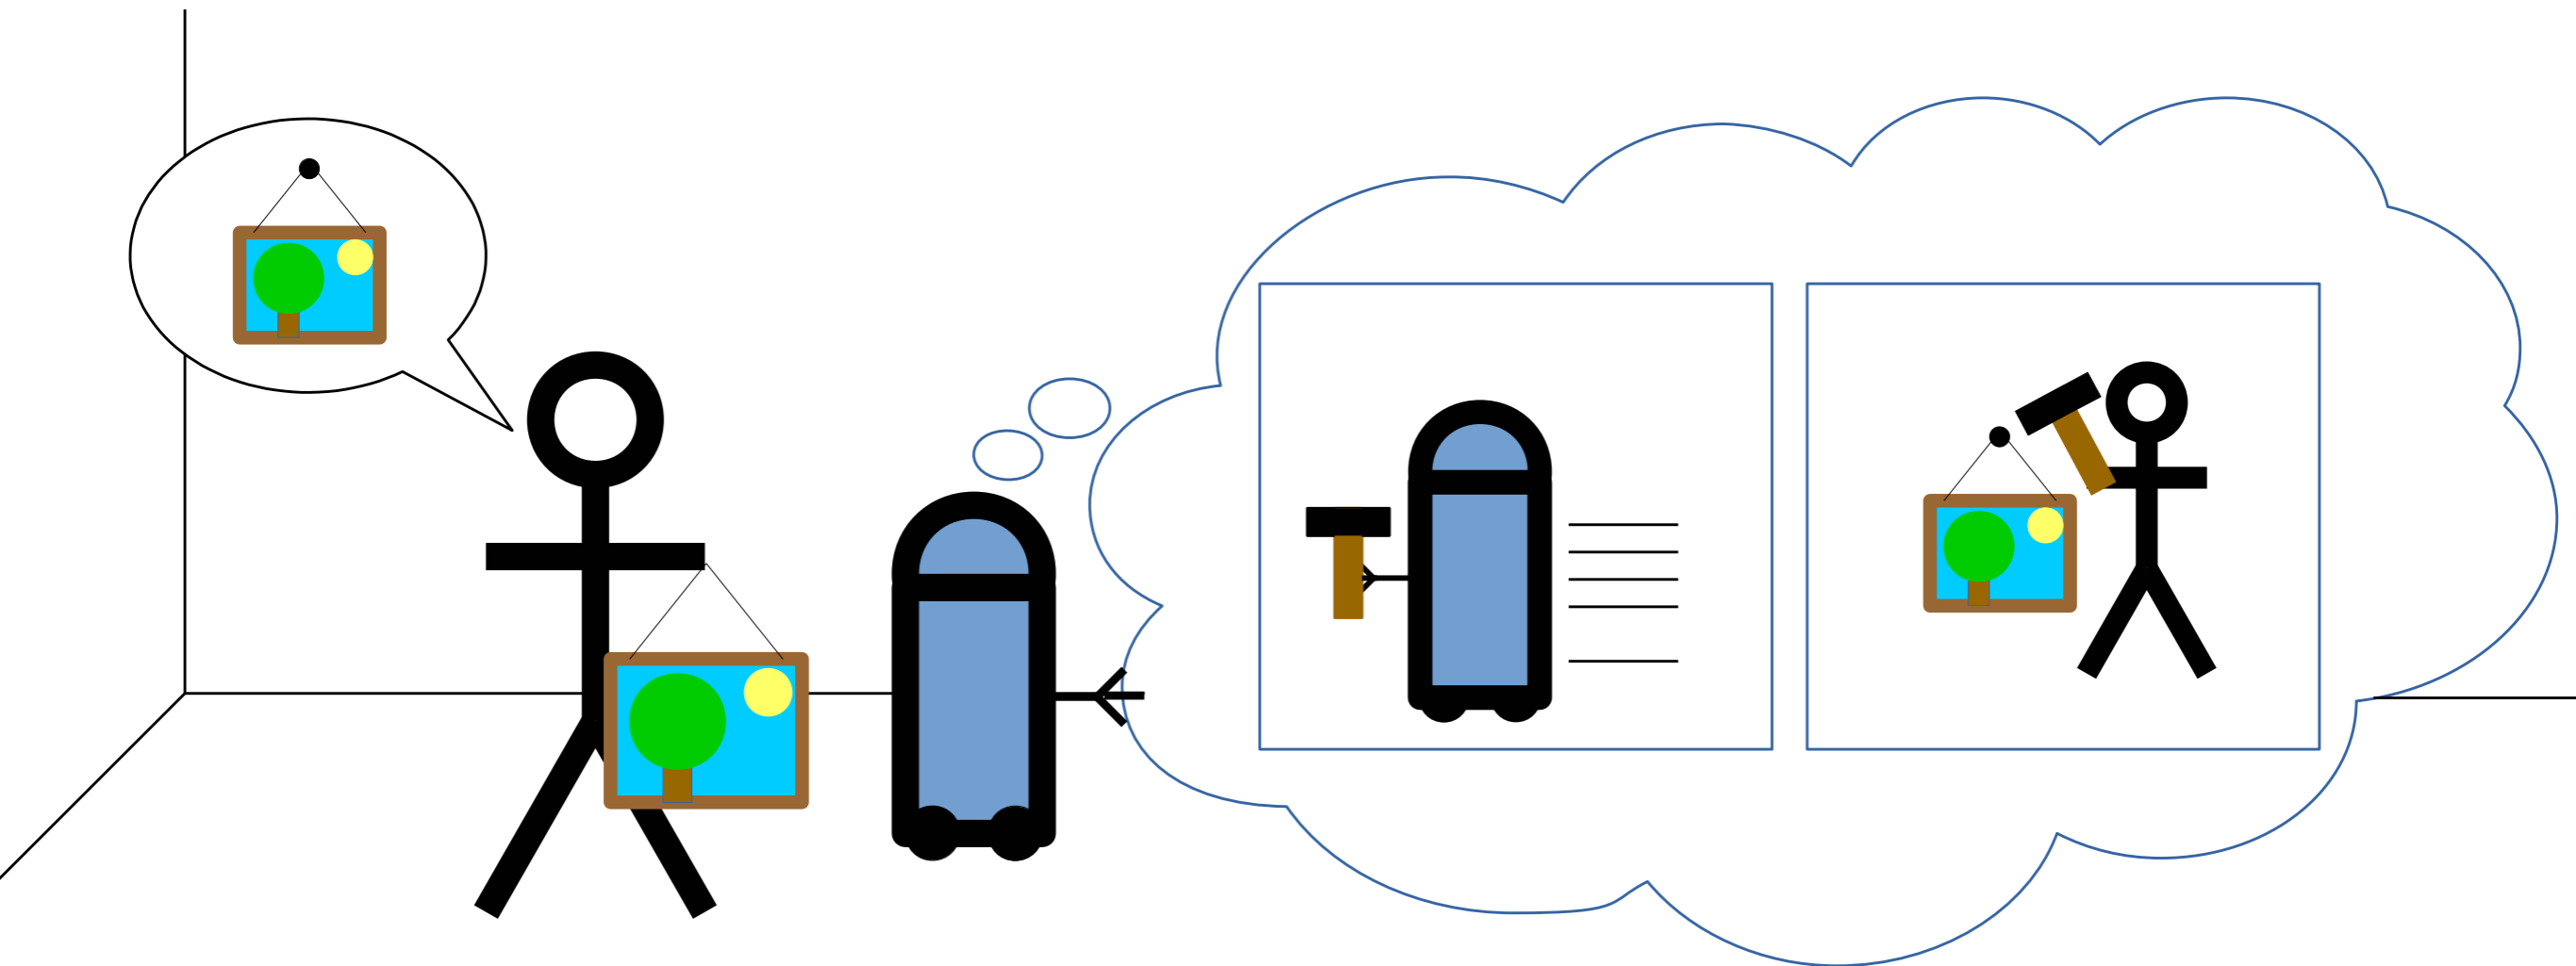

Thomas Bolander, DTU Compute, Danmarks Tekniske Universitet

Store Netværksdag, DTU, 7. april 2016

Hvordan undgår vi at
fremtidens robotter
og computere bliver
sociale analfabeter?

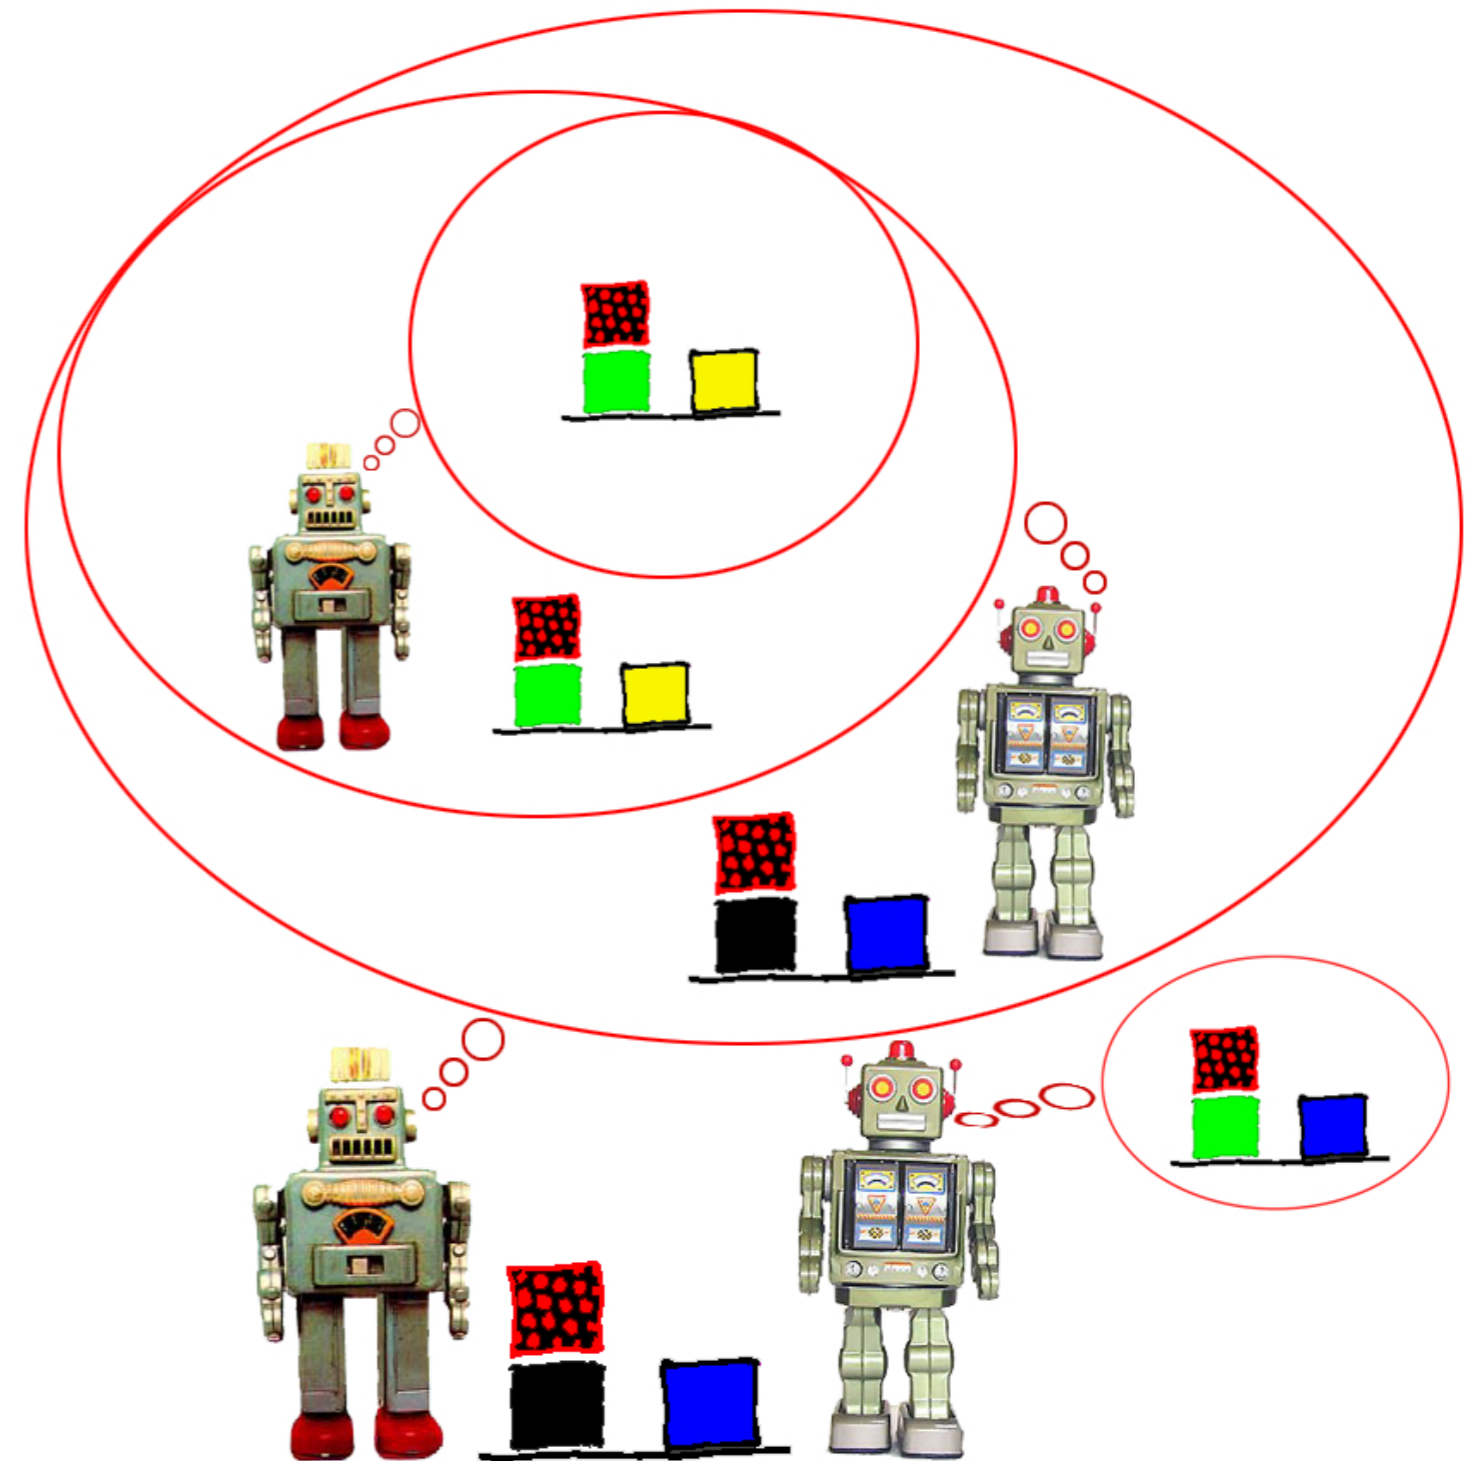

Den hjælpsomme husholdningsrobot

Social intelligens og Theory of Mind (ToM)

Theory of Mind (ToM):

Evnen til at tillægge andre viden, overbevisninger, ønsker og mål (måske forskellige fra ens egne).

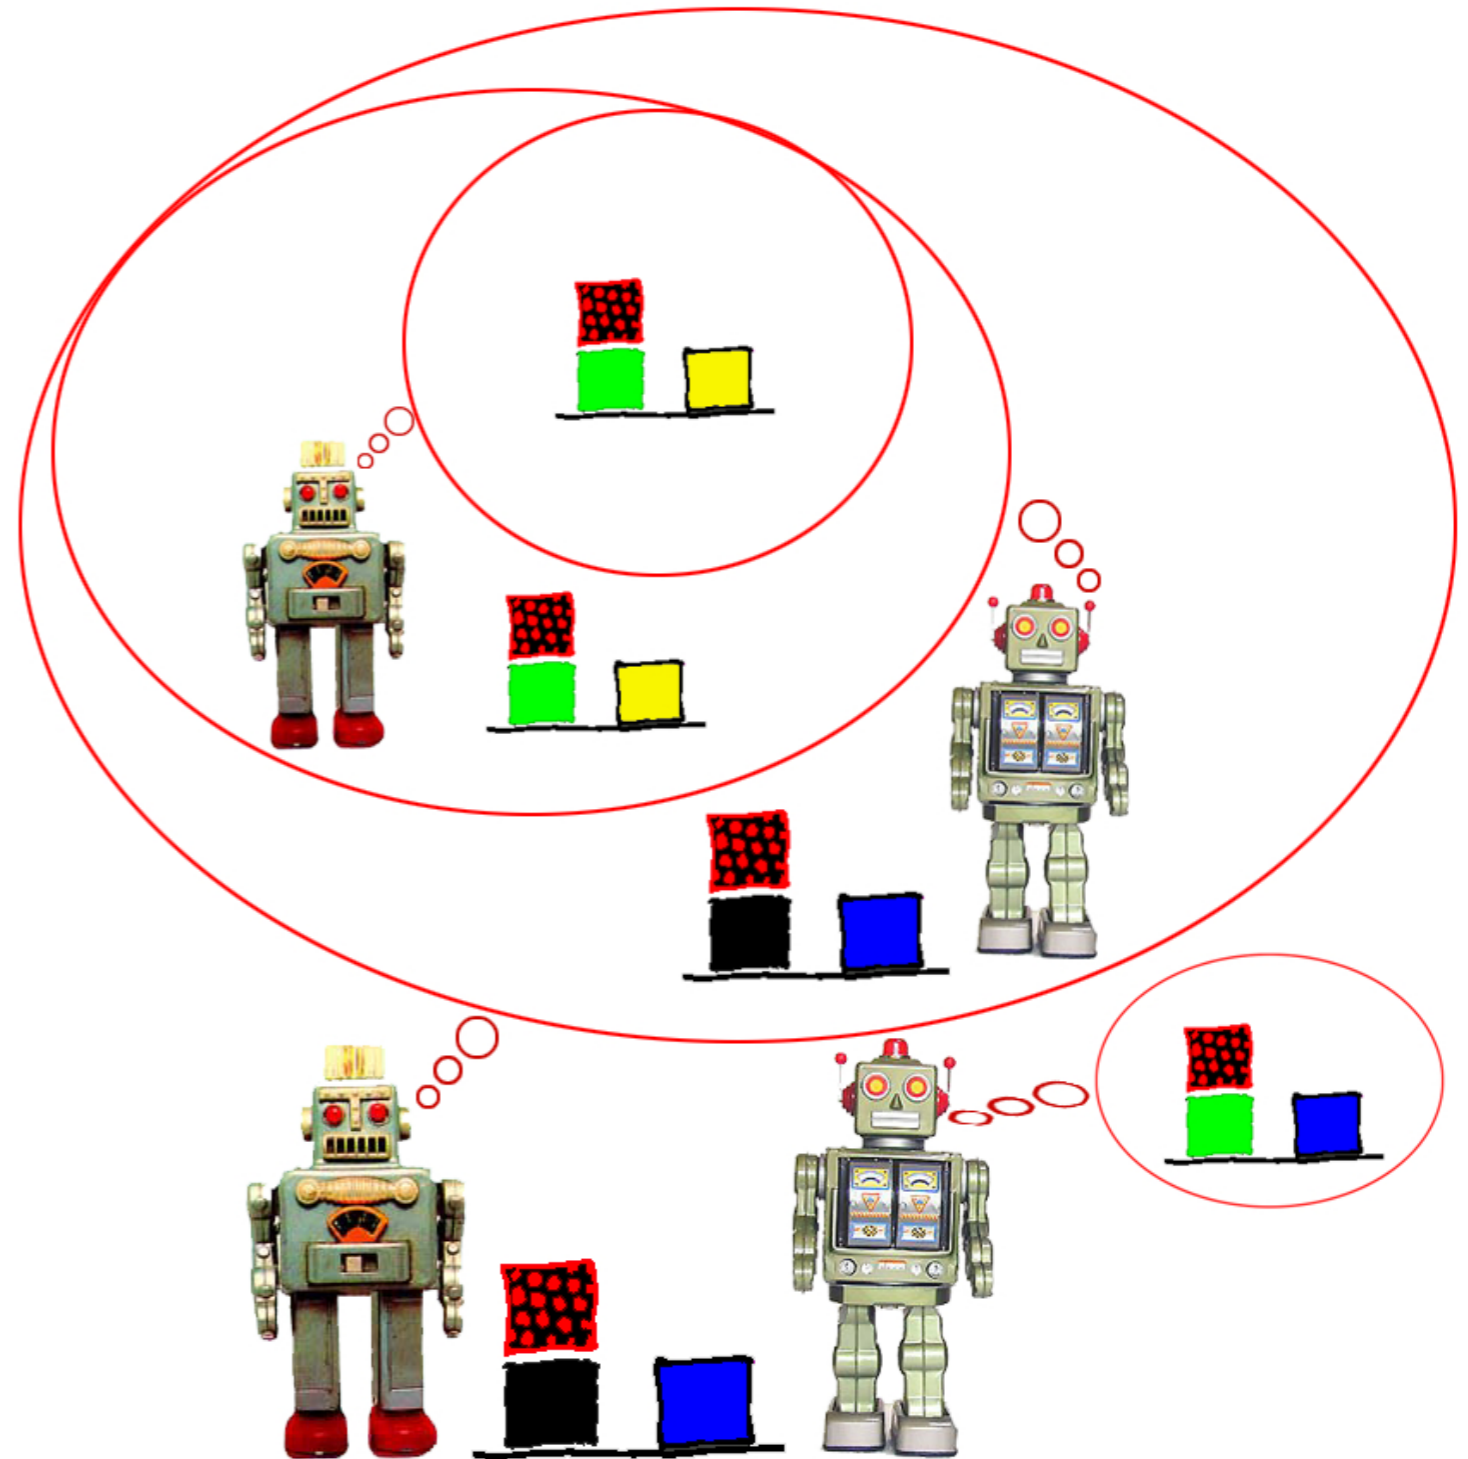

Theory of Mind (ToM) og Sally-Anne testen

En ToM er essentiel for **successful social interaction** hos mennesker.

ToM kan forventes tilsvarende central rolle i kunstig social intelligens.

Menneskers ToM testes ofte med såkaldte **false-belief tasks**, f.eks. **Sally-Anne testen**.

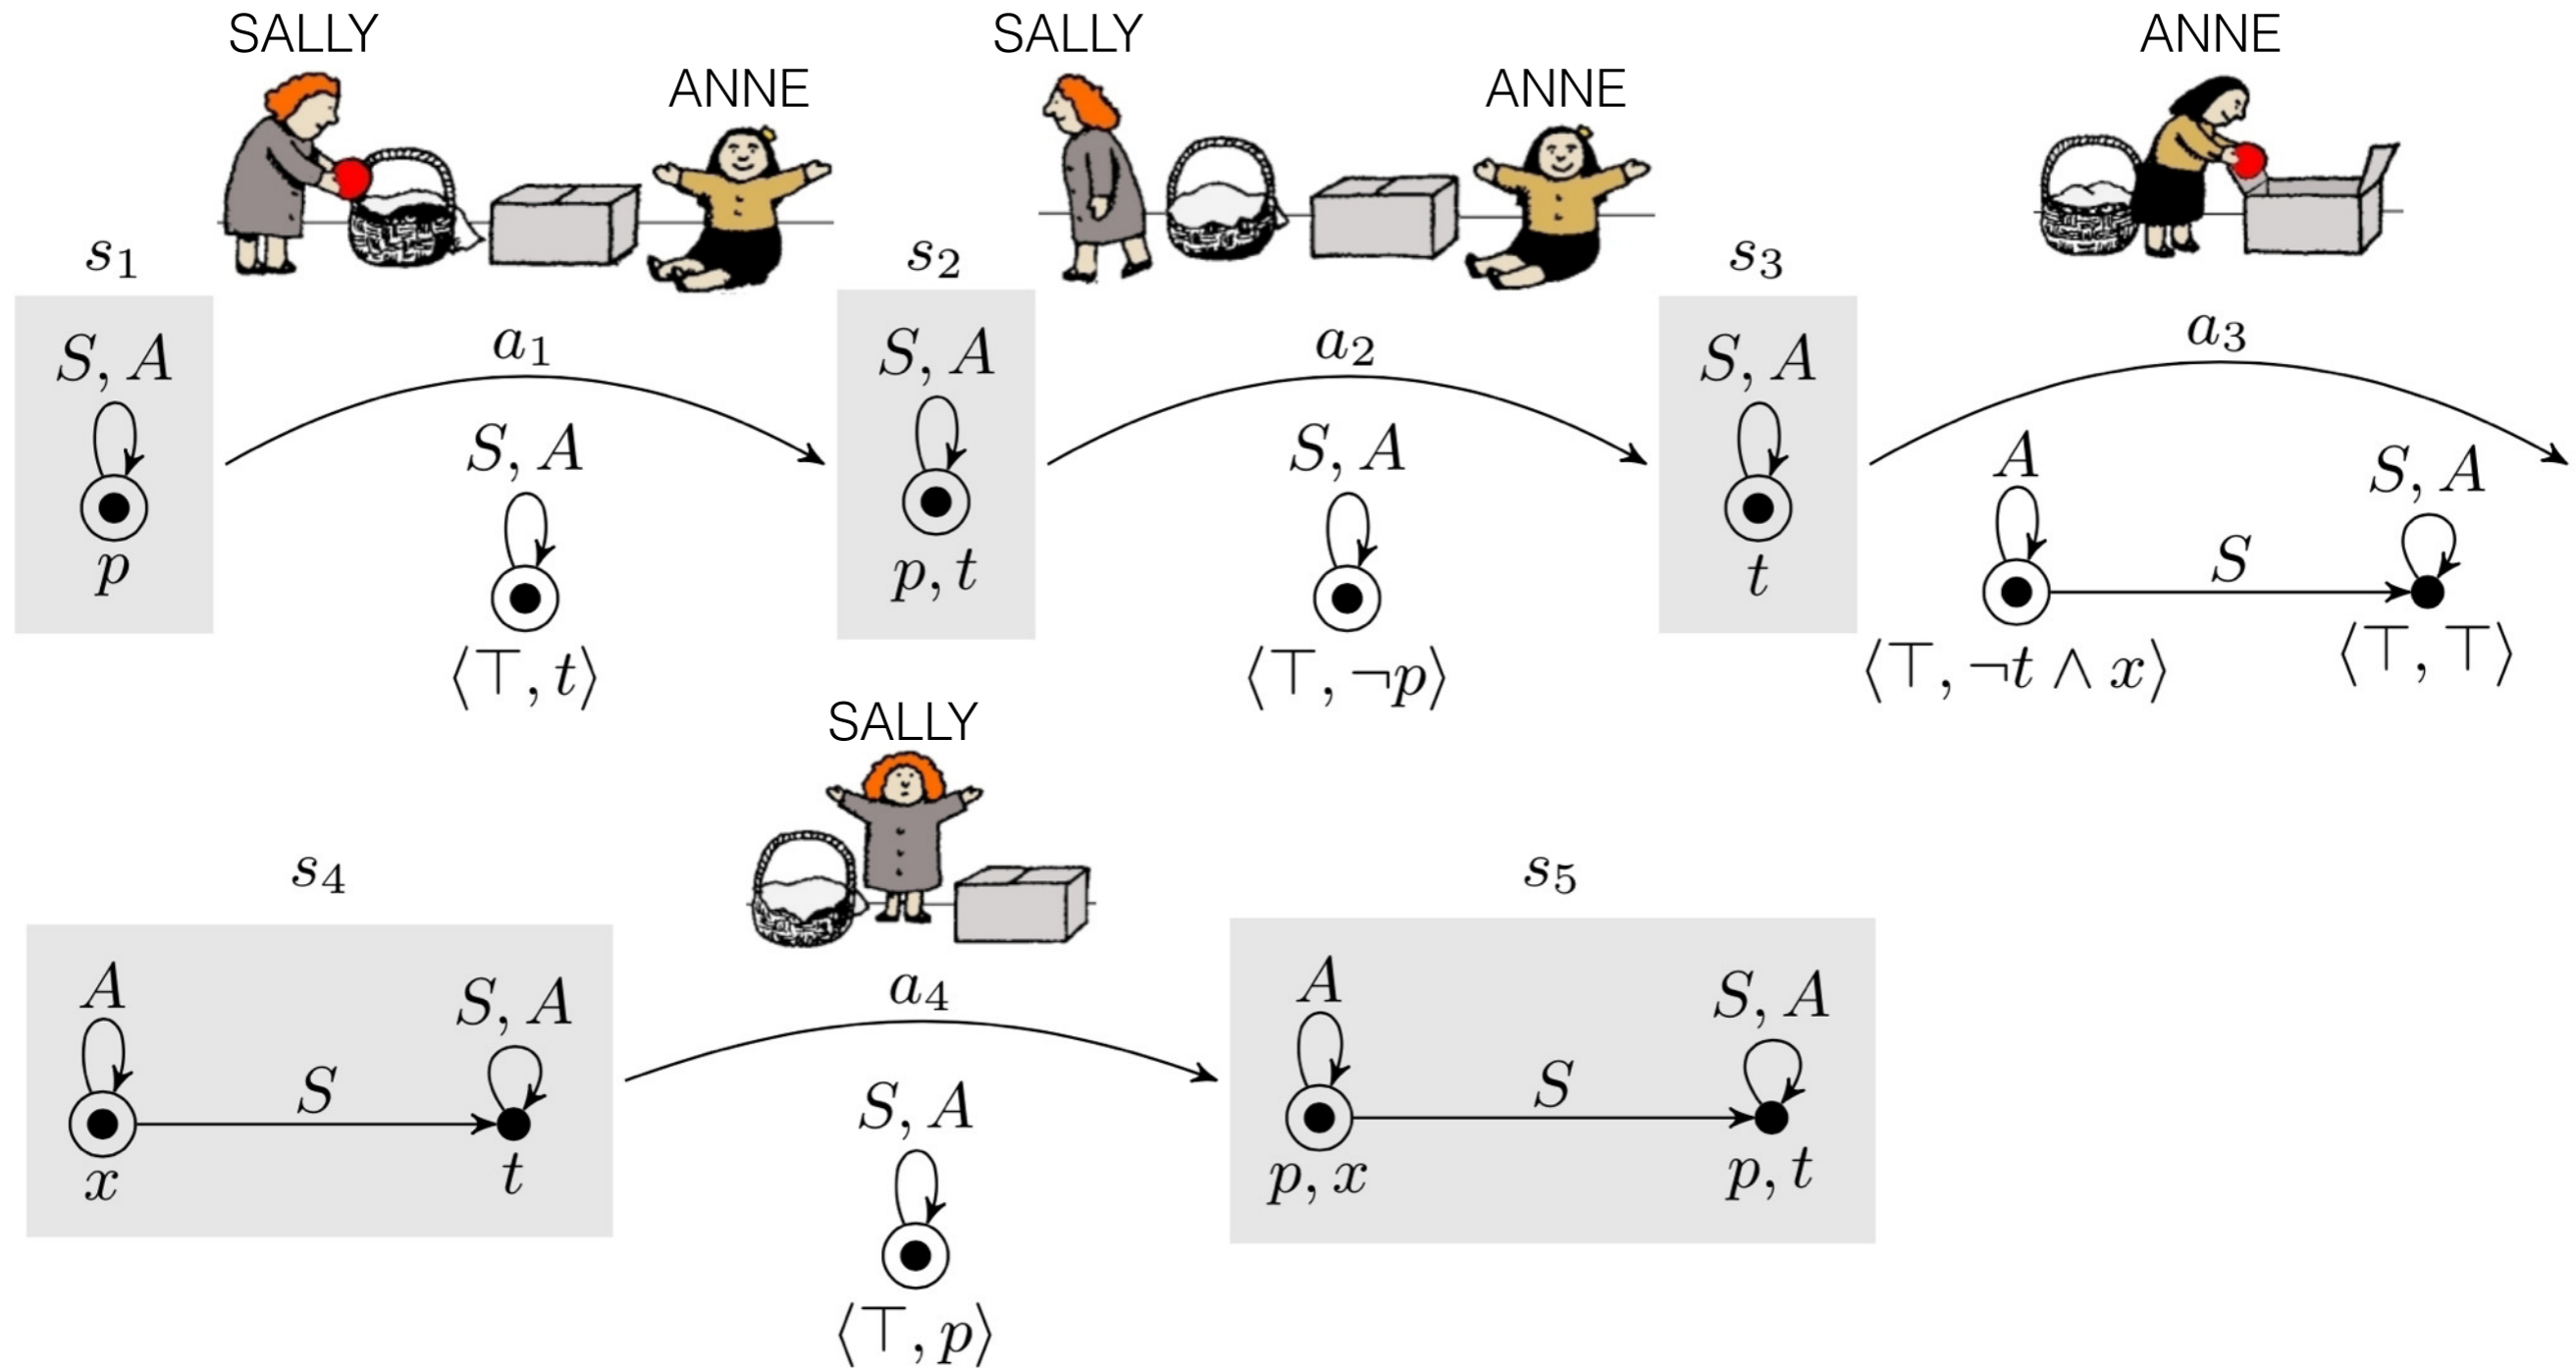

Sally-Anne test

Formalising af Sally-Anne

Fra min artikel:

Thomas Bolander: *Seeing is Believing—Formalising False-Belief Tasks in Dynamic Epistemic Logic*. I Outstanding Contributions to Logic, Springer 2016.

18 måneder gammelt barn

<https://www.youtube.com/watch?v=Z-eU5xZW7cU>

Barnet er ikke givet nogen instruktioner om forsøget på forhånd.
